# Target Populations – A Brief Explanation

- The IPRS system developed by the NC Division of MH/DD/SAS allows for tracking, payment and reporting on all claims submitted by providers for services rendered.
- The Target Population enrollment process ensures the division is processing claims from the appropriate funding sources.

The NC Division of MH/DD/SAS is developing an integrated reporting system (IPRS) to replace three existing systems for claims processing. The IPRS is being built on the existing Medicaid managed care system (MMIS) currently processing Medicaid claims. The IPRS will be used to track, pay and report on all claims submitted by providers for services rendered. Area programs/LME's will submit a single claim to the state, and the IPRS will process the claim from the appropriate funding source, Medicaid, Pioneer, CTSP and related risk contracts.
